

Kiki Cubb

ABOUT ME

Kiki Cubb is an international composer who began studying piano in France at the age of nine. She continued to study music until her late teens. Classically trained, she moved to the United States and due to the day to day demands of life, she was distracted from her passion for composing music for some years. More recently, a tragedy prevented her from playing on her 100 year old Steinway for 3 years. After resuming playing and as a healing process, she discovered a newfound passion for composing again.

Today Kiki lives in Maine, spending time with her family, friends and her beloved dogs, Max, Charlie and Chloe and sharing her music with the world.

Boasting more than 12M YouTube views Kiki has released multiple singles as well as an EP, Chasing the Dream.

"I sit at my piano and let my heart guide me. I believe that if you let your heart guide you as an artist, you cannot be wrong. I thank God for the continued inspiration, whatever it may be."

"If the music I compose makes you feel, transport you somewhere, makes you dream, brings you peace or heals you....then I have accomplished what I am supposed to do as an artist and a composer. My dream is to get my compositions picked up for movies."
